Leading brand in coextruded WPC (Wood Plastic Composite) products, globally recognized for its innovative design and cutting-edge technology.

At **One Decking**, we combine the natural beauty of wood with the durability of plastic, offering high-quality outdoor solutions that are both aesthetically appealing and exceptionally resilient.

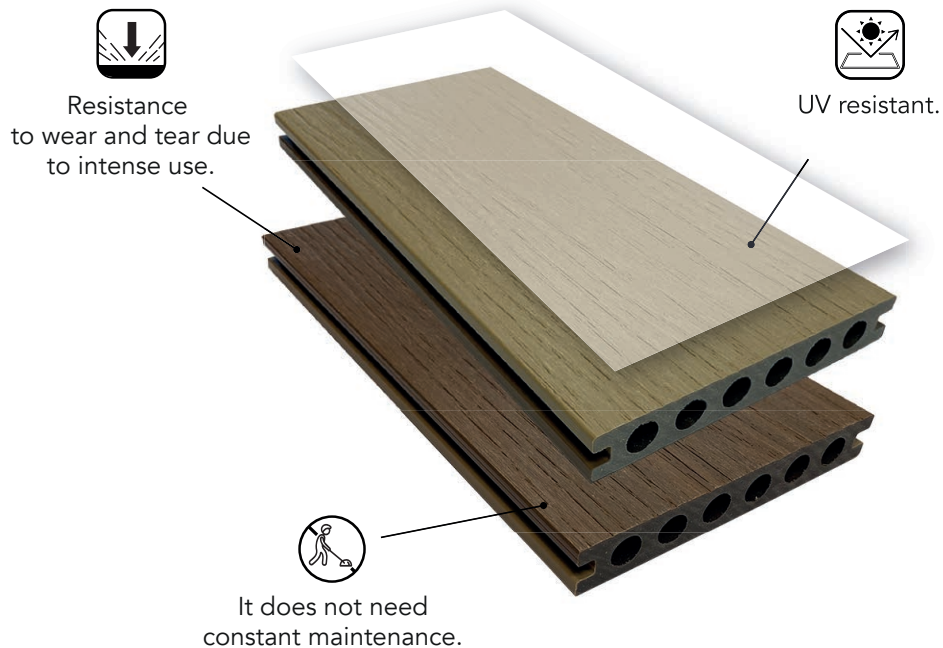

Each piece of **One Decking** is meticulously designed using sustainable materials and advanced production techniques, enabling us to offer products that not only meet but exceed international standards. With a presence in numerous countries around the world, **One Decking** has become synonymous with excellence and trust in the outdoor products sector.

---

# Everseal

---

Our coextrusion process ensures products with a protective layer, **Everseal**, One Decking's leading technology. **Everseal** enhances resistance to wear, weather and UV rays, ensuring that our decking, beams and wall panels maintain their impeccable appearance for years. This advanced technology provides a protective barrier that maximizes durability and minimizes maintenance, allowing you to enjoy your outdoor spaces with peace of mind and confidence.

---

# Benefits

---

UV resistant.

Environmentally friendly.

Resistance to wear and tear due to intense use.

Deeply embossed grains for greater durability.

Resistant to weather conditions such as cold, rain, heat, humidity, etc.

It does not need constant maintenance.

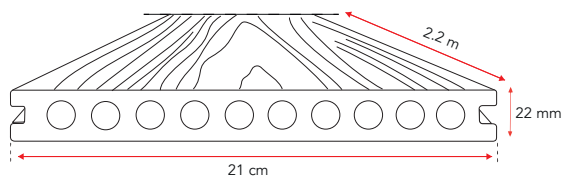

Periodic cleaning is not necessary.

It does not allow the proliferation of insects and organisms that degrade the wood.
